

# Polyurethane Protective Boots SJ8665

UV light resistance

*Tough, durable protection for radomes and other aircraft structures.*

3M™ Polyurethane Protective Boots SJ8665 are pre-formed and used extensively in private, commercial and military aircraft to fit the complex curvatures of a variety of applications.

These boots are designed to help provide long lasting protection of radomes, wing and stabilizer tips, landing gear pods, composite parts,

and other portions of aircraft from rain, moisture ingress, UV light, insects, sand, sleet, snow, and most other airborne particle erosion damage.

The boots are part of a 3M family of high performance surface protection products available for various aerospace applications worldwide.

Designed to help protect aircraft from the damaging effects of –

- UV light • Rain
- Insects • Sand
- Snow • Sleet
