LYNX PILOT SYSTEM

HTC AUTOGYRO HEADSET LEAD

REF: E080-1 05-06-08

INSTALLATION INSTRUCTIONS

The HTC Autogyro Headset Lead allows a Pilot System headset to be connected to the intercom systems installed in aircraft manufactured by HTC in Germany.

NOTE:

The Funkwerk (Filsler) radios fitted to HTC Autogyros can be set to work with either 'Dynamic' or 'Electret' microphones.

If the microphone level is too high and the VOX is too sensitive, the microphone level selector switch setting on the side of the radio must be changed from 'Dynamic' to 'Electret'.

IMPORTANT
