

New Skybolt SK2003-50ADJ Series Adjustable Platemount

STC 'd FAA-PMA and TSO-C148

February 6, 2012

US Patent 7,997,843

All new for 2011...the Skybolt SK2003-50ADJ Platemount is fully adjustable for all ranges of common #82 Southco, Cloc® or Camloc® 2000 and 4000 Series Cowling Fasteners. One fastener dash number covers the entire cowling at the firewall. Designed to replace the Cessna/Lord J7444 Series Platemount, the SK2003-50ADJ has the exact flex features as the J7444-42 part. Skybolt designed 28 years of expertise in this premium quality mount so that it mounts exactly as a replacement part. And new for 2011, the SK2003-50ADJ can be adjusted without removing the cowling for an exact fit. The *Skybolt SK-SP5 Adjustment Tool* is inserted through the fastener grommet to engage, unlock, and adjust the insert in .015 increments. It is so easy, adjustment can be done blindfolded!

Cessna Part# J7444-14 Used On - 67-On C150 (10ea), 67-86 C172 (11ea), C172XP (13ea) 68-78 C177 (14ea)

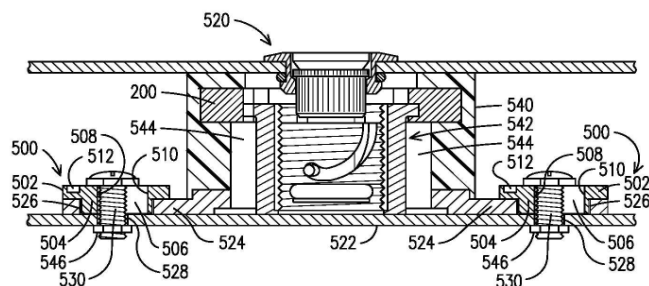

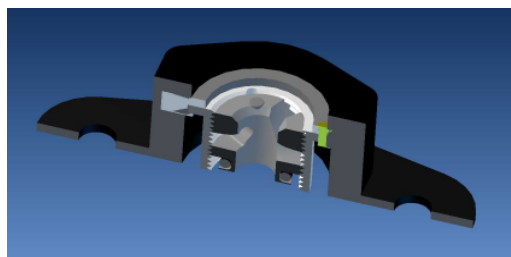

Skybolt Part#	Description	Suggested Fastener	Unit Weight		Note
			SK2003-14ADJ	J7444-14	
SK2003-50ADJ	Southco	82-19-xxx-20	.0230Lb 10.4g	.0310Lb 14.0g	Supercedes SK2003-14ADJ
Use with standard fasteners:
